

fig. 1

Dimension: 3/8" w x 5.25" h

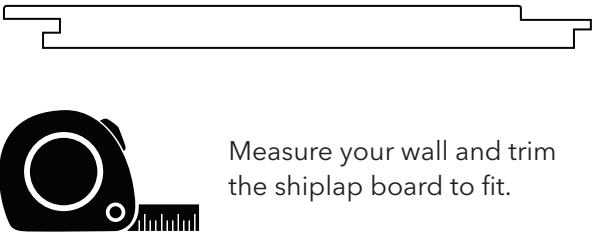

SL525
LAMINATE
SHIPLAP

A decorative wall panel used for statement and accent walls.

1

Remove everything from the wall including any nails. Gently remove baseboards, crown molding and trim. Also, be sure to remove any wall plates and outlet covers.

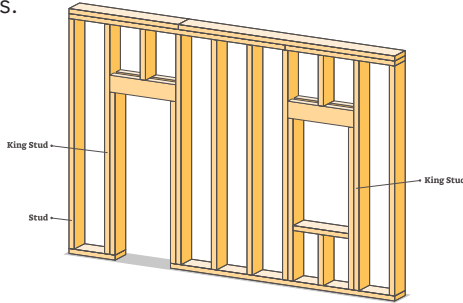

2

Measure your wall and trim the shiplap board to fit.

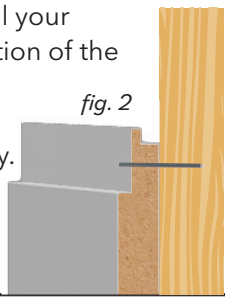

3

Identify and mark stud locations.

4

Starting from the bottom, install your shiplap positioned in the direction of the image (fig. 1). Our shiplap is manufactured with a tongue & groove design for extra security. (It's best practice to install your nail in the back "lip" of the shiplap (fig 2).)

5

Repeat step 4, continuing up the wall until complete.
